

Successful projects are built on strong relationships. Just ask our Smart™ customers.

“ Using Kainos Smart™ to test the Workday update was just so easy compared to our previous approach. It was like a totally different experience.

Kainos is a great company because Smart™ is a great product. It's an outstanding company, however, because of its attention to customer service. Every group that I have interacted with as we've integrated Smart™—project management, consultants, customer success, and customer support—has demonstrated this commitment to customer satisfaction.

Pamela Sherman

Senior Database Support Analyst – Bentley University

“ As your Workday footprint, grows so does your support footprint—for updates, integrations, new functionality, and training. Kainos Smart™ is one of the tools that you can use to keep that gap as small as possible

...the support from the Smart™ team has been fantastic. They've acted as a partner with us throughout our contract, which is very rare.

Seth Brahler

Senior Director of HRIS – Cornell University

More Colleges and Universities

that count on Smart™ every week to boost their Workday testing, free up key staff, and reduce risk.
